## CONCLUSION!

Sequences defined recursively use the $\qquad$ term(s) to find the next term of the sequence.

Sequences defined explicitly use the explicit formula to find the $n$th term.

## HOMEWORK!

Given the following formulas, find the first 4 terms.

1. $\begin{aligned} & t_{1}=0 \\ & t_{n}=t_{m-1}+6\end{aligned} 0,6,12,18$
2. $\begin{aligned} & t_{1}=-4 \\ & t_{n}=t_{n-1}+2\end{aligned}-4,-2,0,2$
3. $\begin{aligned} t_{1} & =8 \\ t_{n} & =t_{n-1}-4 \\ & 8,4,0,-4\end{aligned}$
4. $t_{n}=3 n-1$
5. $t_{n}=4 n+3$
$7,11,15,19$
6. $t_{n}=-5 n+2$
$-3,-8,-13,-18$

There's more on the next page, but I still wanted to fill this space with something.

7. Write an explicit and recursive formula for the following sequences. d
a. $-4,-6,-8,-10 \ldots$
Explicit: $a_{n}=-4-2(n-1)_{\text {Explicit: }} \quad a_{n}=84,71,58,45 \ldots \quad \downarrow$

$$
\text { Recursive: } \begin{aligned}
& a_{1}=-4 \\
& a_{n}=a_{n-1}-2
\end{aligned} \begin{aligned}
& a_{1}=84 \\
& a_{n}=a_{n-1}-13
\end{aligned}

## Sequences Practice Worksheet

Name $\qquad$ Class Period Arithmetic Sequences: $A$ sequence of terms that have a common difF. between them.

Formula: $a_{n}=a_{1}+(n-1) \cdot d$ where $a_{1}$ is the first number in the sequence and $d$ is the common difference.
Geometric Sequences: A sequence of terms that have a common ratio between them.

Formula: $a_{n}=a_{1}(r)^{n-1}$ where $a_{1}$ is the first number in the sequence and r is the common ratio.

Are the following sequences, arithmetic, geometric, or neither? *If they are arithmetic, state the value of $d$. *ll they are geometric, state $r$.

10. Use the formula from question \#9 to find the value of $a_{7}$ and $a_{20}$

For the following sequences, find $\alpha_{1}$ and $r$ and state the formula for the general term. Don't forget to simplify!

14. Use the formula from question \#13 to find the value of $a_{4}$ and $a_{12}$.

## Decide il each of the following scenarios describes an arithmetic or geometric sequence. Then, write the formula for the sequence.

15. A student comes to school with the flu and infects three other students within an hour before going home. Each newly infected student passes the virus to three new students in the next hour. This pattern continues until all students in the school are infected with the virus.
